## Our live beer exchange market

The concept of the Brokers Bierbörse in the BERLINER REPUBLIK on Schiffbauerdamm is unique in Berlin.

The beer exchange market –BIERBÖRSE– with its 16 different tap beers does not know fixed prices.

Every day, starting at 5 pm, the beer prices begin to fluctuate.

From this moment on, supply and demand regulate the price of the beer –just like at the New York Stock Exchange.

Our rules are plain and simple:

Your order will be entered in our stock system which permanently calculates the beer rates. For example, the price for one type of beer could be as low as 1,55€ for a 0,3l sized beer – and just a few minutes later, it could rise significantly to high demand.

As we have a large selection of beers it is always possible to choose a beer at low market value. However, the more popular a beer is, the more expensive it gets, and vice versa.

The different television screens make it possible for you to continuously follow the market development and the price of your favourite beer.

Jever	1.65	König Pilsner	1.65
Paulaner Pils	1.75	Köstritzer	1.75

Watch out for the market crash! It's the Beerbroker's Favourite!

At irregular times, also depending on the activities of the trade, there are stock crashes. This means that for a period of time, every type of beer drops to its minimum price.

Be ready for the bells to ring, which announce the crash, and witness the prices fall

Cheers & Prost!
